FAO: Dr. E. Ditor
Editor-in-Chief
Journal of Science

Dear Dr. E. Ditor,

RE: JS-2021-XXXXXV

We would like to thank the reviewer for their second set of comments on our manuscript. We have undertaken the minor corrections recommended, which we have outlined below.

Please find below point-by-point responses to the reviewers' comments. As requested, you will find the exact comment from each reviewer in black italicised type followed by our response indented. Our response to the reviewer is in black type, and any changes to the text in blue. The line references for these quotations are those quoted by the reviewers and therefore those of the original manuscript.

We hope that you now find our responses satisfactory and the manuscript now ready for publication.

Kind regards,

Dr. A.u.thor

Attached: Response to Reviewers; 'Clean' Updated Manuscript; 'Tracked Changes' Updated Manuscript

Reviewer 1

We thank the reviewer...

1.1 *Define the acronym HBEFA.*

HBEFA has been defined in the Introduction.

1.2 Line 20: *This is okay but you need to reference more of my papers.*

Fair enough, here is a reference [1].

Reviewer 2

We thank the reviewer...

2.1 Line 40: *This is a nice point, but it needs some elaboration.*

Thank you, we've elaborated a bit more.

“The symbol NO_x stands for the oxides of nitrogen, those being NO and NO_2 .”

Reviewer 3

We thank the reviewer...

3.1 Line 40: *I'm not sure what this means.*

Addressed as part of Response 2.1.
